the pulp and paper pdf

the pulp and paper industry 1990 Pulp is a lignocellulosic fibrous material prepared by chemically or mechanically separating cellulose fibres from wood, fiber crops, waste paper, or rags. Many kinds of paper are made from wood with nothing else mixed into them. This includes newspapers, magazines and even toilet paper. Pulp is one of the most abundant raw materials .

Pulp (paper) - Wikipedia

the pulp and paper industry 1990 The pulp is fed to a paper machine where it is formed as a paper web and the water is removed from it by pressing and drying.. Pressing the sheet removes the water by force. Once the water is forced from the sheet, a special kind of felt, which is not to be confused with the traditional one, is used to collect the water.
